

## A COMPLETE MANIFESTING AND SORTING SOLUTION FOR COURIER AND MAIL SERVICE PACKAGES

The IMS-1000 automates the manifesting and sortation of patient orders for your central-fill or mail-order pharmacy. Significant staffing reductions and space savings are combined with error reduction as patient orders are automatically weighed, labeled, sorted by clinic, retail location or courier and manifested. Up to 1,250 orders can be manifested per hour, with minimal staffing at the induction and takeaway points. Various sizes and configurations are available, and the fully customized system can adapt to your pharmacy's specific requirements.

## IN-MOTION MANIFESTING SYSTEM

With this system, a pharmacy operation can expedite the weighing, labeling and manifesting of courier and mail service packages with less staffing and more efficient use of space.

### FEATURES & BENEFITS

- Output = 1,000–1,250 packages per hour
- Staffing reduced by up to 80%
- Overhead omnidirectional scanner reads customer-specific LPN or shipping label
- In-Motion weigh scale sends weight to shipping system for rate shopping
- Intelligent tamp pad allows for a wide variation in package height and size
- Carrier compliant label is printed and applied on demand
- Finished package is diverted to appropriate bin or sack
- Sort locations are operator controlled and available as dual or single side dispense
- Various sizes and configurations are available with unlimited sorts
- System can be customized to fit almost any requirement
